## DETAILED ACTION

### *Election/Restrictions*

1. Claims 1-9, 14-19 and 21 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the telephone interview held on September 24, 2005.

### *Double Patenting*

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Art Unit: 3727

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer.

A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 10-13, 20, 22 and 23 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 4, 5, 8-11, 20, 21 and 45-51 of copending Application No. 10/412,0008 in view of Florian (U.S. 3,989,158). It would have been obvious to use an angled wall to wedge the barrier in frictional contact with a protrusion, as taught by Florian, in order to restrict unintentional movement of the barrier without permanently securing the barrier in place.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

#### *Claim Rejections - 35 USC § 103*

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 10-13 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yang (U.S. 6,378,325) in view of Florian (U.S. 3,989,158). Regarding claims 10-13 and 20, Yang does not teach the upwardly angled extension of the barrier. Florian as seen in Fig. 6 teaches the upwardly angled extension at 32 for wedging with the outer container. It would have been obvious to make the barrier of Yang conform the shape of the outer container as taught by Florian to make insure that the extension remains properly seated in the outer container and is not accidentally displaced by the contents on top of the barrier.

6. Claims 22 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yang (U.S. 6,378,325) in view of Florian (U.S. 3,989,158), as applied to claims 10 and 20 above, and further in view

Art Unit: 3727

of Ferguson (U.S. 6,153,237). The primary reference of Yang does not specifically state that the lid forms a liquid tight seal. Ferguson teaches that it is known to provide a compartmented container with a lid which forms a liquid tight seal (see col. 5 lines 21-27). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the modified device of Yang with the lid forming a liquid tight seal, as taught by Ferguson, in order to keep the contents of the device fresh.

### ***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art is cited for the barrier and container body sidewall engagement.

8. **In view of the double patenting rejection, THIS ACTION IS MADE NON-FINAL.**
